PROFESSIONAL EXPERIENCE

Software Development Intern,

Indian Cyber Crime Coordination Centre (I4C), Ministry of Home Affairs

02/2026 – 06/2026

Remote

- Developed reusable **React.js** components and managed component state using **React Hooks** (useState, useEffect) to build modular and maintainable UI modules.
- Integrated **RESTful APIs** using JavaScript fetch, handling **JSON** responses and rendering dynamic backend data within frontend components.
- Implemented responsive interfaces using **CSS3**, media queries, and **Flexbox**, ensuring consistent layouts across desktop and mobile screen sizes.
- Used **Git** and **GitHub** for version control, working with feature branches and pull requests as part of the development workflow.

SKILLS

Languages & Web Technologies — JavaScript (ES6+), C++, Python, HTML5, CSS3

Frameworks & Libraries — React.js, Tailwind CSS, Pandas, NumPy

Tools & Platforms — Git, GitHub, Vercel, VS Code, Jupyter Notebook

CS Fundamentals — Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, REST API Architecture

Leadership & Execution — Team Leadership, Problem Solving, Cross-Functional Collaboration

Client & Communication — Client Management, Requirements Gathering & Pitching, Technical Communication

PROJECTS & RESEARCH

[ML Framework for Air Quality Index Forecasting](#) , Team Lead & Data Engineer

01/2026 – 04/2026

- Led a **4-member research team** in designing and developing an AQI forecasting system covering **5 major Indian metropolitan areas** — Delhi, Mumbai, Bengaluru, Chennai, and Hyderabad.
- Coordinated data collection, model development, and performance validation workflows while presenting technical findings and weekly progress to faculty stakeholders.
- Engineered automated **Python** data pipelines integrating multi-source meteorological and PM2.5 datasets, optimizing preprocessing scripts to reduce pipeline runtime by **40%**.
- Benchmarked **Linear Regression, Random Forest, Gradient Boosting, and LSTM** models and developed a weighted ensemble approach that improved prediction stability over statistical baselines.

[Personal Website & Developer Landing Page](#) , Designer & Frontend Developer

05/2026

- Designed and developed a responsive single-page portfolio using **HTML5, CSS3, and JavaScript**, implementing fluid layouts and mobile-first breakpoints for cross-device compatibility.
- Optimized frontend delivery through **asset compression** and **deferred JavaScript loading**, improving initial page-load performance.
- Configured **Vercel CI/CD** with GitHub integration, enabling automated production deployments on repository updates.

[Responsive Commercial Marketing Web Application](#) ,

09/2026

Freelance Frontend Web Development Project

- Managed client requirements, content migration, and end-to-end delivery of a **paid commercial web application** from initial development through production deployment.
- Built the application from scratch using **HTML5, CSS3, and Vanilla JavaScript (ES6+)**, with custom responsive layouts and media queries for cross-device compatibility.
- Integrated **Instagram Reels** and dynamic media sections to support client branding and increase interactive content across the website.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science (Big Data Analytics),

Chandigarh University — Apex Institute of Technology

08/2022 – 06/2026

Mohali, Punjab, India
